Announcing the new CareerOneStop

Visit the new CareerOneStop at www.CareerOneStop.org.

Launched in March 2015, the new CareerOneStop website offers streamlined access to key resources and tools for job seekers, businesses, veterans, students, workers with disabilities, older workers, workers with criminal convictions, and more. And for those seeking career, training, or job search resources on the go, the site is fully mobile-ready—meaning it automatically adjusts to fit smartphone or tablet screens.

Watch What can CareerOneStop do for you? for an overview, or get started at one of the six main sections:

- Explore Careers—Get quick access to occupation details as well as information on self-assessments, career planning, and more
- Find Training—Find local training programs as well as information on training options, certifications, licenses, financial aid, and more
- Job Search—Find job listings updated daily from US.jobs, America’s Job Exchange, CareerBuilder, and Indeed, along with enhanced tips on networking, resumes, interviews, and more
- Local Help—Use the American Job Center Finder and nearly a dozen additional tools to easily locate and get contact information for local workforce services across the United States
- Toolkit—Find all of CareerOneStop’s online tools in one spot—more than three dozen tools in all

CareerOneStop’s event schedule

Look for our booth at any of these upcoming conferences:

- Abilities Expo
  Edison, NJ

  Durant, OK
  August 17-21
- ASBDC
  San Francisco, CA
  September 8-11

Coming Soon!

What’s CareerOneStop working on next?

- Updates to Site Search
- A new Employer Locator
Check out the Credentials Center

In March 2015, CareerOneStop launched its new Credentials Center ([www.CareerOneStop.org/Credentials](http://www.CareerOneStop.org/Credentials))! Visitors will find a one-stop site for learning about and selecting the education and training option that will most benefit them—whether they want to get a job, advance in their workplace, change careers, or meet another employment goal.

Visit the Credentials Center to get started in one of four main sections:

- **Training Options**—Find straightforward information on the range of available training options, from high-school equivalency to certificates, certifications, or advanced degrees
- **Afford Training**—Learn about financial aid, training benefits, and other sources of paying for education and training
- **Find Your Path**—Plan and meet training goals based on your unique needs and experiences, as well as labor market demand
- **Toolkit**—Access free, user-friendly tools to help locate training programs, schools, certifications, apprenticeships, occupational licenses, professional associations, American Job Centers, local job postings, and more

Just like the redesigned CareerOneStop, the Credentials Center is mobile-ready so it automatically adjusts to fit smartphone or tablet screens.

Visit [www.CareerOneStop.org/Credentials](http://www.CareerOneStop.org/Credentials) to check out the new resources and email CareerOneStop at info@CareerOneStop.org with your feedback or questions.
The latest: CareerOneStop’s blog

You can stay up to date on relevant topics including job search, interviewing skills, and more from CareerOneStop. Here are just a few of the blog posts.

- [Top 10 careers for graduates with a 2-year degree](#)
- [Boost your career with a certification](#)
- [5 high-pay careers: no college degree required](#)

### Case study: Cybersecurity Competency Model

We rely on computer systems to help us in virtually all aspects of our lives. . . at home, in our business, in government, and as part of our national defense efforts. It is vital that those computer systems be protected from information theft or system sabotage. That’s where cybersecurity experts come in: their job is to ferret out the weaknesses in systems, and design and implement protective measures.

How can academic institutions effectively prepare students to meet the ever-growing needs of cybersecurity employers?

Find out in this new case summary on the activities of the National Cybersecurity Institute (NCI) at Excelsior College, now available on Competency Models in Action. It details how NCI uses the Cybersecurity Competency Model, published in June 2014 on the Competency Model Clearinghouse, to validate existing curricula and to design new curricula to meet the needs of the cybersecurity industry sector.

### Advanced Commercial Buildings Competency Model

The Competency Model Clearinghouse’s latest model has been released! The Energy: Advanced Commercial Buildings Competency Model answers the demand for a commercial buildings workforce that possesses advanced competencies in operations, maintenance, and energy-related technologies. This project is closely aligned with new national workforce guidelines for the job titles of Building Operations Professional, Energy Auditor, Building Commissioning Professional, and Energy Manager. The model was developed.
by the Consortium for Building Energy Innovation (CBEI) in collaboration with the Department of Energy Office of Energy Efficiency and Renewable Energy (EERE) and the National Institute of Building Sciences (NIBS)/DOE Better Buildings Workforce Guidelines project. Other forthcoming models are in Enterprise Security, Hospitality and Tourism, and Engineering.

**Coming Soon**—look for the new Enterprise Security Competency Model in late April!
